

## CUSTOM DISTRIBUTORS

If you can't find a distributor for your older engine application listed in this catalog, Mallory can build a custom distributor for just about any automotive application dating back to the '20s. If we don't have your application's information on file, simply supply us with your OEM factory distributor and in most cases, we can engineer and manufacture a modern electronic style or a single / dual point replacement unit for you.

Do you need a mechanical tachometer drive? We have you covered. How about a trigger unit for a modern electronic fuel injection system being installed on your older engine? We can do that too. Below are listed just a few of the more common "specialty, street rod and & antique" applications that we already have setup in our system.

If you don't see what you are looking for call our Tech Service department at 216-688-8300 #500
